

ABDULAZEEZ ALANI

Web Developer

ABOUT ME

I am a certified web developer with expertise in React and modern front-end technologies. Focused on building responsive, user-centered applications and writing clean, scalable code. Actively seeking opportunities to contribute to real-world, production-level software.

EDUCATION

Bachelor of Science (Chemistry)
First Class (Honours)

University of Ibadan
2016 - 2020

SKILLS

- React
- JavaScript
- Typescript
- Next.js
- Tailwind CSS
- Python
- Git & GitHub
- HTML
- CSS

LANGUAGE

- English
- Yoruba

Egbeda, Lagos, Nigeria.

WORK EXPERIENCE

Frontend Developer Jan 2026 - Present
Synoloop Solutions

- Developed a web application dashboard using React and Next.js, implementing authentication flows including login, registration, forgot password, reset password, and password change with full API integration. Translated detailed Figma designs into responsive, accessible UI components using Tailwind CSS, supporting desktop and mobile layouts.

PERSONAL PROJECTS

Color Picker

- Built a responsive color picker app that enables real-time color selection with instant visual feedback, multi-format color values (HEX/RGB/RGBA), palette creation and persistence, random color generation, drag-and-drop palette management, and one-click copy. Implemented using React hooks, reducers, and context for scalable state management.

Typing Test App

- Developed a fully functional and responsive typing speed test application that allows users to measure typing speed (WPM), accuracy, and performance in real time. The app supports multiple test modes (timed and passage-based), difficulty levels, and dynamically generated test content. It includes performance tracking with personal bests stored locally, real-time feedback, and a results summary upon test completion.

Weather App

- Built a responsive weather forecast app using React, TypeScript, Tailwind CSS, and the Open-Meteo API. Implemented location search, geolocation-based weather detection, unit switching, hourly and daily forecasts, saved favorite locations, loading/error states, and mobile-optimized UI interactions.

CERTIFICATIONS

The Web Developer Bootcamp

- Completed an intensive full-stack web development program covering HTML, CSS, JavaScript, React, Node.js, and MongoDB, with practical projects emphasizing real-world application development.
- Link: https://bit.ly/udemy-certificate-web_developer-abdulazeed_alani

The Modern React Bootcamp

- Completed an advanced React coursework covering class components, functional components, Hooks, Context API, reducers, routing, and Next.js, with practical projects focused on scalable, modern frontend development.
- Link: https://bit.ly/udemy-certificate-react-abdulazeed_alani
